

Verdict By Coroner's Jury Gives No Opinion as to Cause of Fatality

At Inquest Brings in Report That Emil Vaterlaus Came to Death From Injuries Received Last Saturday Evening in Car Driven by Edgar Rosenroll—In Addition to One Fatality the Two Other Occupants of the Car Were Injured

"We, the coroner's jury empaneled to inquire into the death of Emil Vaterlaus, find that the said Emil Vaterlaus came to his death from injuries received in an automobile accident on the Calgary and Edmonton trail, about three miles south of Wetaskiwin, on Saturday, September 17, 1927, about nine o'clock p.m.; the said car being driven at the time of the accident by Edgar Rosenroll of Wetaskiwin."

The above is the verdict as handed down by the jury which sat at the inquest Tuesday evening. The investigation was conducted by Dr. A. S. MacColgan, coroner, and Sgt. Broadribb, and the jury was composed of D. MacEachern, foreman; Chas. H. Boyer, Chas. D. Egan, Alex. Sims, George Gothard and H. R. French.

Otto Naef was the first witness and he stated the deceased was a native of Switzerland, that he came over here for a year and a half; he had viewed the remains at the undertaking parlors and they were those of Emil Vaterlaus.

Hans von Allmen informed the jury, through Mr. Runtz, who acted as interpreter, that he came over on the boat with Vaterlaus and he had met him several times since they arrived in the Wetaskiwin district. On Saturday, deceased, another man and himself had driven to town from New Norway. They went to the hotel and had three drinks of beer. After supper at the hotel, Edgar Rosenroll told them he would soon be ready to go to Hobbsville to meet a number of other boys who were natives of Switzerland.

Before leaving he went to Rosenroll's house. Vaterlaus asked if he had something to warm them up and Edgar Rosenroll brought out a flask containing about a pint of whiskey. Each one of them had a drink with water. Vaterlaus put the flask in his pocket while Rosenroll was absent from the room. It was between 8:30 and 9 o'clock when they got into the car. Rosenroll drove the car and Vaterlaus was the driver. I sat in the back seat and Vaterlaus was in the front. The party went to Rosenroll's office for some books. I sat in the car while Rosenroll and Vaterlaus went into the office to get the books. We then left for Hobbsville. We were going and Vaterlaus caught the steering wheel five or six times on the way down. This caused the car to swerve. When we got about three miles down and when Vaterlaus leaned over again, I heard a crack. I don't know what happened, as I was thrown out and I don't remember. The car was on the grade on the left hand side before I heard the crack. I was lying about four feet from the car, next to town, and the front of the car was facing the road and I was on the right side. Rosenroll and I got up at the same time, and Vaterlaus was lying on the left hand side and in front of the car.

Co-Operative Confidence Most Essential, So Declares Brownlee

Vancouver, B.C., Sept. 15.—The recent decision of the railway board, reducing the rate on westbound grain, shifts many miles to the eastward the great divide of wheat traffic. Premier J. E. Brownlee, of Alberta, told delegates to the Canadian chamber of commerce convention last night at Chilliwack. What removal of the boundary line between the area shipping grain east and that sending it west meant, it was unnecessary to explain, he said, "because everyone knows what that means—to Vancouver."

Mr. Brownlee's address, the third speech given before the convention by prairie premiers in three nights, was the feature of the banquet tendered by the Vancouver Board of Trade and brought the three-day conference to a close.

Premier's Appeal
The Alberta premier's address was an appeal to the chamber to aid in driving home the need of co-operative confidence in the future of Canada.
The door of opportunity stood open in Canada today as not before in many years, he believed. Retarded though it had been by the economic strain of the war, the Dominion, nevertheless had manifest advantages.
"First," he said, "we have lower taxation than other countries, unless it is the United States.

HOSPITAL AID PREPARING FOR BAZAAR IN NOVEMBER

Preparations are under way for the Hospital Aid bazaar to be held in November. Donations of plain sewing and fancy work will be gratefully received. As this is the only appeal from the Hospital Aid during the year we hope that everyone in the town and country will get behind it and do their utmost to make the bazaar a success.

Donations from Millet will be received by Mrs. A. H. Parker.

MAROOED ON SHORES OF LAKE WINNIPEG

Winnipeg, Sept. 19.—Reports received from Grand and Victoria beaches early this morning indicated that the pole which lashed Lake Winnipeg, Saturday and Sunday and marooned nearly 400 persons at the Canadian National railway summer resorts, was dying down. Cut off from the outside world, it was feared that the people, mainly residents of Winnipeg, who were taking a final week-end at their summer homes, might run short of food, but the moderation of the gale gives promise of prompt relief. Early today a train carrying food left Winnipeg for Baconsia, from which it will be conveyed to the cottages by boat. The C.N. trucks two miles south of Grand Beach are under three feet of water, while at Alfred, between Victoria and Grand Beaches, trucks are also inundated, cutting off temporarily the eastern shore of the summer colony from rail communications.

Late Saturday afternoon the wind, which had been churning the lake waters, turned to a gale. Throughout the remainder of the night and Sunday, 15-foot waves pounded the shore line in the maddest carouse of Lake Winnipeg for years.

CONSERVATIVES ELECT DELEGATES FOR CONVENTION

At a meeting of the Liberal-Conservatives of the federal constituency of Wetaskiwin, held on Wednesday afternoon, the following delegates were elected to attend the convention to be held in Winnipeg next month: C. H. Russell, D. MacEachern and H. R. French, of Wetaskiwin; Dr. Hynes of Lacombe and Dr. McClelland of Lodge Alterne; C. E. Bowker, of Rimby; P. W. Pratt of Lacombe; John F. Hays of Gwynne and Mrs. Frank Childy, H. C. Cooke and R. W. Stanley of Wetaskiwin.

Among those in attendance at the convention were Senator Greishbach, H. R. Miller, K. C. J. McCleary and Jas. A. Collins.

NO CANADIAN CATTLE FOR MANCHESTER

London, Eng., Sept. 16.—The fact that not a single head of Canadian cattle has reached Manchester since last April has been a matter of some comment, which elicited a statement from the secretary of the Manchester association of Importers and Exporters that it was due merely to market conditions.

"Trade is so good between Canada and the United States," the statement says, "that better prices are realized there. When the market swings again, importation will probably be resumed."

JUVENILE TRAVELERS ARE CURTAILED BY ORDER

Edmonton, Sept. 15.—A ban has been put on the traveling privileges of the public during the epidemic of infantile paralysis. To the extent that children under 15 years of age will not be permitted to reside outside of their home municipalities.

Such an order has been passed by the provincial board of health and is being sent in placard form to every postoffice in the province for display. Copies are also being sent to the provincial police with instructions to the postoffices.

Local boards of health are being notified by letter about the new order, which they are expected to enforce in their respective municipalities.

Mr. John MacEachern of Wetaskiwin, left for his home on Wednesday, after spending a short holiday with Mr. and Mrs. S. MacEachern—infall Province.

Messrs. C. B. McMurdo, J. Richards and B. W. Bellamy addressing the City Council Tuesday evening, having been selected by the Wetaskiwin Sports Association as a special committee to interview the city fathers in the interests of the Association. It was pointed out that considerable work had already been done by the Association towards the transformation of the oval at the Exhibition Grounds into an ideal sports field and well over a hundred dollars had already been expended on this work.

Montgomery Has One Case New Disease

Authorities of Municipality Takes Precautionary Methods to Stop Spread—No More Cases in City

A case of infantile paralysis was last week reported in the Crooked Lake district, a 10-months' old child having been stricken, and the municipal authorities have taken precautionary measures to check a spread of the disease. The local Board of Health, Municipal District of Montgomery No. 458, has ordered that, in compliance with instructions of the Provincial Board of Health, no persons under the age of 15 years will be permitted to change their place of residence to points outside the Municipality unless a permit has been issued by the local Board of Health of the Municipality.

A meeting of the local Board of Health of the Municipality District of Montgomery was held in the Council office on Thursday last. T. T. Jevne, chairman, and the following members were present: C. Johnson, J. Maynard, R. Ballhorn and C. R. Shantz, The Medical Officer, Dr. C. N. Gundersen, was in attendance.

The Board was informed that the Board of Trustees of the following schools had already decided to close their schools: Mountain District, John Knox and Rosebush.

They were also informed that many parents were not allowing their children to attend school, with the result that the attendance at the schools that were open was very small.

It was moved by C. Johnson, J. Maynard that all the schools and Sunday schools, dance halls, etc., in the Rural Municipality of Montgomery No. 458 be closed by order of the Board until the 1st of October, and that no meetings of any kind be held in any private dwellings until that date, with a view to preventing the spread of infantile paralysis into this district.

Carried unanimously.
It was decided to hold the next meeting of the Board on Saturday, the 1st of October.

Up to the time of going to press no new cases of infantile paralysis had been reported in the district. The two patients affected are doing nicely, and the cases are understood to be of a mild type. A child in the Wang school district was taken down the first of the week, and all schools in the M.D. of Montgomery are now closed.

Peonies From Prince for Our Diamond Park

At Tuesday evening's meeting of the City Council the following communication was read from W. Prest, local manager of the Bank of Montreal:

"I take much pleasure in advising you that, upon instructions from His Royal Highness, the Prince of Wales, there will be sent direct to the City of Wetaskiwin, by parcel post, a gift of peony plants. His Royal Highness is presenting a selection of these plants to each of the cities, towns and villages of Canada during the Diamond Jubilee year of Confederation, and by his direction the distribution is being made through the managers of the Bank of Montreal at its branches throughout the Dominion. Instructions in regard to the planting and care of the plants are enclosed. The plants will be shipped in time for planting this fall."

On motion of Aldermen Inglis and Paton it was decided to place the plants in charge of the Park Board, with instructions to nourish them in contemplation of giving the gift from His Royal Highness planted in the new Diamond Jubilee Park, which was dedicated last summer.

ever, a considerable further expenditure would be necessary this fall if the new grounds were to be ready for use next spring, and the Association felt that, in this worthy enterprise as well as its activities in the fostering of various kinds of sports under one governing body, a commendable effort had been launched which warranted the support of various civic bodies and other organizations. It was pointed out that between one hundred and twenty-five and one hundred and fifty membership

ESTEEMED FAMILY LEAVE FOR TRIP THROUGH STATES

Mr. and Mrs. P. C. Petersen and family left on Wednesday morning of this week by motor for Iowa, where they expect to spend the winter with relatives and friends. He also desired through The Times to say goodbye to the friends he had met here, as it was impossible to meet them before leaving.

HEAT WAVE GOES EAST WITH BIG GALES OF WIND

New York, Sept. 16.—All local heat records for September 15 were broken when the mercury soared up to 90 degrees Thursday afternoon. Only one prostration was reported.

Other cities in the East also suffered from great heat. Washington registered 102 degrees.

In Baltimore five persons were prostrated when the temperature went up to 97 degrees. Philadelphia also had the hottest September 15 on record with 95 degrees.

Defective wind storms swept through sections of Eastern Pennsylvania Thursday night. Heavy damage was caused by the wind in the vicinity of Pottsville and in Delaware and Montgomery counties.

BOAT MAIL BY AIR SAVES EIGHTEEN HOURS

Montreal, Sept. 17.—Eighteen hours' saving was effected by the aerial transportation of 500 pounds of royal mail from the S.S. Empress of Austral to Montreal on the arrival here yesterday of an airplane from Rimouski inaugurating Canada's first air mail service.

The air machine, an ILS, two L. flying boat, took off from Rimouski at 9 o'clock yesterday morning and arrived at Montreal at four o'clock in the afternoon. Six hours and 30 minutes was the actual flying time.

The rail journey from Rimouski to Montreal takes from twelve to thirteen hours.

CANADA'S FUTURE WHEAT PROSPECTS

Victoria, B.C., Sept. 17.—Canada's importance now and the greater importance it would assume as a wheat producing country was dealt with by G. H. Barr, K. C. Regina, before the Pacific foreign trade council yesterday. He pointed with pride to Saskatchewan's production of 35 per cent. of the wheat of Great Canada.

Canada's potential wheat supply was three and a quarter times greater than the world's production, he said, and in the last year she had led the world as a wheat exporting country.

The Canadian wheat growers would eventually be able to supply the bread requirements of 217,000,000 people in addition to Canada's needs.

Free trade relations between the United States and Canada must eventually come, he said, in a brief reference to tariffs.

150 MEDICOS HEAR SCIENTIFIC PAPERS

Calgary, Sept. 15.—Seventy-eight members of the medical profession from practically every section of the province attended the opening session of the convention of the Alberta Medical Association and the Alberta College of Physicians and Surgeons at the Palliser hotel on Wednesday morning.

Additional delegates arrived during the day, increasing the number of the convention to the neighborhood of 150.

The papers presented at the morning session were of a purely professional character.

DIVORCE RATE UP

London, Sept. 20.—The number of divorces in England is one to every 100 marriages, according to an estimate by the Registrar General. Two of every three divorces are granted to women.

Divorced marry again, while only half the women re-marry. The divorce rate, though low, is high as it was before the war, and is only one-seventh of the rate in the United States.

On motion of Aldermen Scott and Paton it was decided to make a grant of \$100 to the Association, for which the delegation expressed much appreciation.

Look at the label on your paper,

Deposit Must Be Paid for Installation Water Pipe Lines by Owners

Deposit System Re Utilities Service Will Be Retained—Arrangements for Water Service Charged Against Property—New Steel Cells for Police Station—City Fathers Talk of Danger at Railway Crossing and Discuss Many Other Matters

Alderman Gothard was the only absentee from Tuesday night's session of the City Council, his services having been requisitioned in connection with the inquiry into the fatal auto accident of Saturday evening last.

The minutes of the last regular meeting, on Sept. 6, and of special meetings on the 14th and 15th were accepted as read on motion of Aldermen Inglis and Scott.

The recommendation of the Finance Committee that accounts totaling \$1875.71 be paid was adopted. General, \$358.97; electric, \$957.19; water, \$88.55.

Mr. Merner appeared before the Council on behalf of the application of Rev. S. Kaeschke, who desired to procure a license for the purpose of soliciting orders for clothing, as representative of an out-of-town firm, but who argued that inasmuch as the year had almost entered its final quarter, the fee of \$50 was a bit steep. However, the city fathers were unanimous in their opinion that no consideration could be given the applicant without any reduction. Some of the Aldermen voted the opinion that for salemanship of this nature the city was now entering on its best period and others pointed out that the merchants of the city were assured of protection in the payment of their business tax—that, generally speaking, there would be little objection to give the applicant favorable consideration, provided that a pro rata adjustment was made in the business tax. Mayor Montgomery pointed out to Mr. Merner that it would be necessary to amend the by-law in order to give any consideration to Mr. Kaeschke's application, and that as yet the city fathers were not so disposed.

F. B. George was present to explain his application to the city with respect to the installation of sewage disposal. Some time ago he purchased some improved property from the city, but desired to make an exchange of lots. Considerable expense would be involved in moving his residence and with the additional expense of connection with the sewage system, the problem was one in which he desired the aid of the city. A motion by Aldermen Inglis and Paton, which was adopted, met the situation and Mr. George will move his house.

The Board of Railway Commissioners in a communication announced that sittings of the Board would be held in the west next month, among other places, at Edmonton on the 12th and at Calgary on the 18th for the purpose of hearing applications and complaints brought to its notice.

The reading of the letter signed Alderman Scott into action. He wanted to know what could be done with respect to having protection provided for pedestrians and vehicular traffic at the Pearce street level crossing.

The reading of the letter signed Alderman Scott into action. He wanted to know what could be done with respect to having protection provided for pedestrians and vehicular traffic at the Pearce street level crossing.

Record Crop in This Province and Yield Good Through West

Winnipeg, Sept. 17.—The wheat production of the three prairie provinces this year is placed at 424,312,135 bushels in the preliminary estimate of the Manitoba Free Press, announced last night. This estimate is based on personal inspection of a staff of agricultural experts who have covered more than 5,700 miles of territory and from reports of local correspondents.

The estimated oat production is shown as 553,230,423; barley 3,612,610; rye 14,879,538; and 3,761,399. Compared with the estimate of the Dominion government report, issued last Monday, the Free Press figures are approximately: Wheat, 8,000,000 bushels lower; barley, 52,000,000 bushels lower; rye, 1,000,000 bushels higher; and 1,200,000 higher.

The report fully supports predictions which have been made from time to time of a record wheat crop in Alberta. The Free Press investigators estimate the yield in this province at 175,025,000 bushels, which surpasses the government estimate by nearly 7,000,000 bushels. This total is about 20,000,000 bushels higher than the production in 1926, the year of Western Canada's bumper crop.

Edmonton, Sept. 15.—That any reported damage to the cereal crops in Alberta is negligible following the frost of Wednesday night after severe rains is the opinion of the provincial department of agriculture at Edmonton.

On Thursday a close check-up over the telephone was made by officials of the department and all the main grain growing centres were heard from. Reports as they came in, dispelled all fears of serious trouble, and proved that Alberta's tremendous 1927 wheat crop is safe.

Provincial government field men and Dominion government experimental farms in all parts of the province were communicated with, and the sum total of these reports is that the districts in which this first frost of the fall is reported as being the heaviest are the places in which the least damage could have been done, owing to the very advanced state of harvest operations.

Winnipeg, Man., Sept. 19.—Cutting and threshing operations were suspended all though the West last week as the results of heavy general rains. While it is uncertain how far damage from rust, frost and other causes has extended, it is freely conceded that the crop will be a heavy one according to the weekly report issued today by the agricultural department of the Canadian Pacific Railway. If safely harvested, the crop will put Western farmers in a good financial position. Ground is in excellent condition for plowing, a work that will be undertaken immediately harvesting is completed. (Continued on page 5)

City Fathers Kick Thru With Century for Sports

At Tuesday evening's meeting of the City Council the following communication was read from W. Prest, local manager of the Bank of Montreal:

"I take much pleasure in advising you that, upon instructions from His Royal Highness, the Prince of Wales, there will be sent direct to the City of Wetaskiwin, by parcel post, a gift of peony plants. His Royal Highness is presenting a selection of these plants to each of the cities, towns and villages of Canada during the Diamond Jubilee year of Confederation, and by his direction the distribution is being made through the managers of the Bank of Montreal at its branches throughout the Dominion. Instructions in regard to the planting and care of the plants are enclosed. The plants will be shipped in time for planting this fall."

The Radiant Woman

Mrs. Morrow was the most envied and the most admired woman in Columbia. Yet she was neither young nor beautiful, neither rich nor accomplished. She was, however, that remarkable thing which we seldom see—a radiant woman.

She had come to Columbia for a few casual weeks one summer, had fallen in love with it, bought a home for herself and stayed. The small white house back from the broad village street was charmingly modest and quite big enough for its single occupant and the guests she chose to have there. Mrs. Morrow made no display; she bought comfortable furniture for her home which she arranged with taste. She had brought nothing with her, not even a few books, though she was fond of reading and soon had a well-stocked bookcase.

Everybody except Miss Podd accepted her on the instant, but then Miss Podd never accepted anybody. She was all the time studying Mrs. Morrow, trying to get at her history. "There's something about her," she said, shaking her head.

"That you don't like?" asked Mrs. Tote quickly.

Lorne Street East Wetaskiwin

Morrow announced. "She is coming in two days, and I mean to keep her always if she will stay. You must help me keep her."

The woman who came was as unlike Mrs. Morrow as possible. If one woman was radiant as a star the other was as cold and sad as a burned-out candle. She had been for twenty years in China. She had been forced to come home on sick leave and she was waiting the outcome.

"Poor Helen is so tired," Mrs. Morrow said caressingly. "She will get rested presently."

But Helen Dean did not get rested. Indeed, she faded day by day until it could no longer be doubted that she was about to leave the world altogether.

Mrs. Morrow's devotion was beautiful to behold. She never spared herself in the service of her friend, and Columbia got a new side of her character that touched them unaccountably. Yet in the face of pouring sorrow she continued to be radiant.

"Don't you ever get blue or tired?" demanded Miss Podd. She and Mrs. Morrow were calling on the two women. Miss Dean lay on the couch in the sunny window with that air of waiting which was so heart-breaking to see.

Mrs. Morrow shook her head, smiling, but Miss Dean answered: "I don't suppose there is another woman in the world who knows better what sorrow and discouragement and heart-breaking toll mean than May Morrow."

Then, though Mrs. Morrow made a gesture of silence, she went on quietly: "I know all about her and what she has endured and suffered. Think of living for twelve years on High Mountain. But I suppose you don't even know where High Mountain is. Well, it's the last of the world, the wind blows there forever, you see no living being for days, because you are the only person in the gray shawl on the topmost pinnacle. May went there with her husband to cure him, her body was born there and died there, and so did John. And she almost died there—"

"That you came, Helen, with your beautiful ministering and kept me alive all winter till the snow thawed and I could get down to civilization," Mrs. Morrow said.

"I was home on a furlough," Helen Dean said. "I hadn't anything else to do."

When Money Is Of Little Value

The world must have excitement. With no war of any dimensions to absorb the craving for the startling, other means must be devised to satisfy the longing for adventure experienced by many people.

"Two years were lost in the Dole Derby, the winner of which received \$25,000 for beating his competitors to Honolulu from San Francisco. Two adventurous Frenchmen perished in an attempt to win the \$25,000 Ortel prize, which later was won by Lindbergh.

Several other attempts at crossing the Atlantic have proved unsuccessful, although these have by no means been abandoned.

In Toronto, a German, Ernest Vierkott, won \$30,000 by winning the 21-mile Lake Ontario Marathon. George Young, famous winner of the Catalina Channel, for which he won \$25,000, was taken from the waters of Lake Ontario exhausted.

William Wrigley, Jr., is now planning another Catalina swim in order to pay out some more thousands, as

There was silence, and then Mrs. Morrow said:—

"Well, when Uncle Jack left me that money, I made up my mind I'd turn over a new leaf. I'd try to make people a little happier than I'd ever been myself, but you can't do it unless you—you look the part."

"And so you became a radiant woman?" Mrs. Rose leaned forward breathlessly.

"She picked out a big job for herself, I can tell you," Helen Dean said. "But she is making a success of it. I never told you, May, how I dreaded to come here and see you as I had said when you were sick yet here you are, long as you are, but May keeps me laughing even when the pain is worst."

Just for an instant Mrs. Morrow looked as if she were going to lose her radiance, then she arose.

"It's time for our medicine, Helen. Don't make me hold your nose," she said.

Miss Dean smiled and opened her mouth.

And Mrs. Rose and Miss Podd looked at each other, a long look through tears.

"They always said we were not to know about the radiant woman."

maturing the grain. Thus, according to the inventor, there is no danger of tough, spoiled or bleached grain, and a good hard grade is ensured.

Harvesting Simple
The method of harvesting is simple. The grain heads are merely taken off with a header, which is an inexpensive machine, and are carried up through the roof of the drying building by a straw carrier worked by a small engine. After that the heads are allowed to dry out and may remain any indefinite time until the farmer wishes to do his threshing. For threshing purposes doors are made in one end of the building at the foot and the heads are simply raked out on to the steel apron spread at the foot of an ordinary threshing footer.

For about \$1,000 a drying building could be constructed large enough to look after the grain of a quarter-section, the inventor claims. The trial building on the Hoeft farm at Morinville is said to be housing 35 acres of crop and cost \$160. The benefits claimed by Mr. Rettinger are the elimination of time, stooking, hauling in harvest and the cutting out of the harvest rush. The farmer can get on his head as soon as he has finished cutting. He can thresh whenever he likes and thus distribute his labor bill over the slack seasons. The long stubble can either be burned off or plowed in, according to the farmer's wishes, and burning will kill weeds. It also claimed that more bushels to the acre will result as a header crop and waste grain. Threshing is not done in a hurry, the grain is hard and there is the elimination of the straw pile.

Unique Instruments Brought Into Play in Operation on Ocean

Details of a feat of surgery off Cape Horn, carried out under almost incredible conditions with scissors, safety pin, bent spoons, clothes-pegs and meat-hooks as implements, but ending in success, were related by the officers and crew of the Commonwealth and Dominion Line steamer "Fort Anckland" as she moved into dock at Woolwich, London, England, two weeks ago.

The central figure is the young New Zealand surgeon who was on his way to England for the first time. He is Dr. S. H. Hetherington, just 25, who studied medicine at Dundee University.

As the ship was about to round Cape Horn on June 25, this young surgeon found that a fireman, A. J. Morton, had appendicitis.

Although he had no implements and no qualified assistants, Dr. Hetherington decided that an operation was imperative. In the rough sea the ship was rolling heavily, but the engines were stopped and the dining saloon was chosen as an operating theatre. Air lights were brought and assistants called for.

Among the half-dozen passengers was an English woman, Miss Swindell, the only woman on board, who during the war had some experience as a V.A.D. She and two of the officers were the surgeon's assistants.

Although he had no anaesthetic a tea strainer was covered with a towel, and this was placed over the patient's nose. Ether and chloroform were sprinkled from a bottle until the patient was unconscious and throughout the operation, which lasted from midnight until 3 a.m., the surgeon had to watch the eyes of his patient to see that he was not coming round, ordering more anaesthetic from time to time.

The cut was made with great difficulty with a small pair of scissors, the patient's tongue was fastened by means of a safety-pin stuck through it, and the wound was kept open by means of bent spoons. Clothes-pegs and meat-hooks were also employed. Down below in the kitchen the cook kept his ovens at boiling heat for hours sterilizing the instruments.

Miss Swindell nursed the patient day and night, and the sound was heard of the officers said, "She and the doctor undoubtedly saved his life."

ALBERTA JUBILEE FETES IN HUNDREDS

In response to a request from the national confederation jubilee committee at Ottawa, information is being secured by the Alberta committee as to local celebrations that were held on Dominion day in this province. A list of 120 such events has already been furnished to the Ottawa committee, and there will be more to follow.

The Country Weekly

Let us forget the fundamental place of the Country Weekly in the lives of any community, or misinterpret the rise or decline of a town because of the presence or absence of such an essential to modern progress, let us read and re-read the following characterization by Professor Bristow Adams of Cornell University, says the Research Department of the National Association of Farm Equipment Manufacturers:

"I am the Country Weekly. I am the friend of the family, the bringer of glad tidings from other friends; I speak to the home in the evening light of summer's vineyard porch or the glow of the winter's lamp. I help to make this evening hour; I record the great and the small, the varied acts of the days and weeks that go to make up life. I am for and of the home. I follow those who leave humble beginning; whether they go to greatness or to the gutter, I take to them the thrill of old days with whole some tidings, I speak the language of

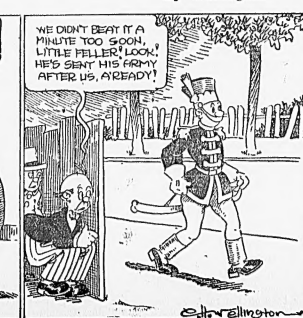

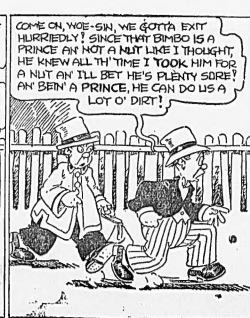

Now Enjoys Eating, Thanks His Wife

PA'S SON-IN-LAW

and when the river is frozen over, the logs are dumped over the bank and, with practically no further labor, transport themselves down with the ice in the spring, the work of the river-drivers being merely incidental in the "moving accidents of flood and field." In the absence of logging railways the operation of loading logs on sleighs is infinitely easier than that of logging on wagons. The snow provides a smooth surface which may be made still smoother by sprinkling, enabling a team to accomplish the work of a dozen horses on a dirt road or, if tractors are used, the saving is in gasoline.

It is the snow and severe weather that makes Canadian furs longer, thicker and glossier than the furs of milder countries. All northern commerce is carried on in snow with reindeer, dogs, snowshoes or skis. With a snowcrust hunters on snowshoes can overtake deer and other hoofed animals. The snowy landscape is a map on which are traced the movements of all the animals of the region for the trapper to read. The crop of fur is sure, it is not a gamble, and its harvesting is not expensive or difficult, but it requires more, a long season of it. In the Yukon in summer His Majesty's mail conveyance must stick to roads or streams. In winter the gasoline snow-tractors save scores of miles of travel because the whole country is levelled of obstructions by the snow blanket. The whole economic life of the North, that country that promises to be Canada's Eldorado, is bound up with snow.

The snowless areas in northern latitudes are usually barren of vegetation for lack of the protecting snow-blanket. For snow in its relation to plant life is primarily a blanket, many blankets, the snow increasing month by month, adding blanket after blanket, until the coldest month, with finally the colossal elderdown of March. Winds distribute the snows unequally, thus producing important local differences in the water content of the soil, and hence in the type of vegetation and yield of cultivated crops. Where winds dry the moisture from the ground in summer they do not melt the snows of winter except in rare cases such as the chinook. Rather they pack it, perfecting it as a non-conductor. The success which attends the culture of red clover in Northern Ontario is due to an early and continuous blanket of snow. Even in the comparatively severe climate of Manitoba winter wheat and red clover succeed where there is sufficient snow-cover to protect them.

Not only is the wind a packer of the snow, but the snow is a packer of the soil where fields are really in the fall for the sowing. Soil-packing lessens the airtightness and aids in bringing up the moisture. It is particularly important in the dry-farming areas. Against this must be put the fact that on lands which have not been fall-plowed the stable acids as a conservator, the snow is slower in melting and therefore more of it soaks into the ground.

Primarily the function of snow is to distribute moisture and its action otherwise is incidental, but the Experimental Farm at Ottawa has ascertained by experiments extending over seventeen years that snow possesses a fertilizing value as a supplier of nitrogenous plant food. Nitrogen, so necessary to plant life, is washed down from the air by the snow and rain, and the Ottawa experiments show an amount of nitrogen made available by this means equal to that provided by eight pounds of commercial nitrate of soda per acre per annum.

The development of water-power in

DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.R. No. 6, Sherbrooke, Ont., writes:—"Last summer I was very bad with dysentery. I lost my appetite, and had such severe pains in my abdomen they made me very faint. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful bowel complaint remedy has been on the market for the best 80 years; put up only by The T. M. Burn Co., Limited, Toronto, Ont.

of the Famous

MODERN

Monarch
MALLEABLE

COMPACT

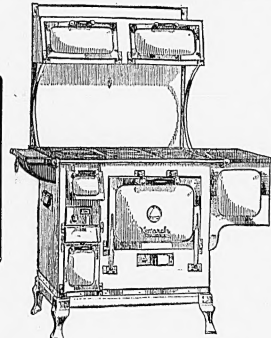

(America's Most Popular Range)

For Three Big Days

Monday, Tuesday, Wednesday

OCTOBER 3, 4, 5

You are going to have an opportunity to see the most beautiful range display ever shown anywhere—A display of the New Design MONARCH Full Enamel Finish

THE RANGE BUILT TO CONFORM WITH THE MOST MODERN PRACTICAL IDEAS OF THE DAY

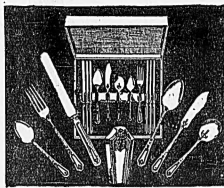

COMPRISING EFFICIENCY, ECONOMY, DURABILITY, BEAUTY AND COMPACTNESS

Every housewife appreciates the advantage of Compactness and the disadvantage and needlessness of great, large kitchens with ungainly equipment which means only additional work and drudgery for her. That's why large kitchens are not being built today, and the size and design of kitchen ranges must necessarily be in keeping with these sensible, practical ideas. MONARCHS are COMPACT in all their dimensions without sacrificing a fraction of an inch of needed space.

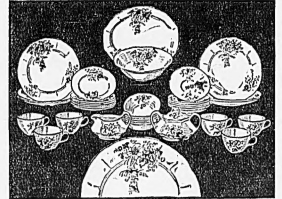

WHETHER YOU NEED A RANGE NOW OR LATER, COME IN AND SEE THIS INTERESTING AND EDUCATIONAL DISPLAY

You will see at a glance why the MONARCH Malleable is the most popular range on the market today. You will be interested in the many Marks of Merit which make it the greatest quality range value ever offered. And it sells for a lower price than the others.

An expert from the MONARCH Factory—the Largest, Finest Malleable Range Factory in America—will be here to explain everything to you.

REMEMBER TOO that a Magnificent 26 Piece Set of Oneida Community Silverware or a 35 Piece Set of Limoges China will be given Absolutely FREE to everyone purchasing a MONARCH Range during this Special Sale.

The MONARCH Practical Payment Plan enables you to buy your range now—during this Sale—on convenient monthly or single time payments—if you haven't the ready cash.

REMEMBER THE DATE—OCTOBER 3rd, 4th and 5th

WHYTE & ORR LIMITED

WETASKIWIN, ALTA.

Canada is now of tremendous importance, and here again snow plays its part in supplying water for the use of the turbines. The winter's accumulation of snow generally makes itself felt in the rivers in June, but if proper measures of forest conservation are not employed will be released sooner, causing flood conditions followed by low water. The provision of storage reservoirs for the snow water is another factor influencing power development, for example, by this means the minimum discharge of the Ottawa River at Ottawa has been increased from 6500 cubic feet per second to 20750 cubic feet per second,

with a proportionate increase in utilisable water power.

The tourist trade brings money into the pockets of Canadians individually and collectively. Switzerland was pitifully poor until she utilized her climatic asset in the interests of winter sports, and Canadians are shrewd enough to add to their riches by advertising their winters. Every hamlet, village, town and city is booming its merits as a winter resort for skiing, snowshoeing, ice boating, tobogganing, skating, hockey playing or merely for wintering. Undoubtedly if snow were of no use in any other way, its fascination for that victim of

change, the tourist, would make it a great national resource.

The more we reflect upon the evidence of Our Lady and Her Snows, the stronger must be our conviction that, not only in itself is snow a great national asset, but on it, to a startling degree, depends the march of prairie that makes for prosperity in many of our leading industries. It is a natural resource renewed annually but, like all natural resources, it may be semi-depleted by waste through failure to retain or provide the means for conservation thereof.

Look at the label on your paper.

Careful Selection of Immigrants Is Urged

Medical Authority Advocates National Board of Management to Deal With Problems of Settlement; Vividly Illustrates Differing Values of Immigrants

Calgary, Sept. 19.—"In the near future we shall witness a tremendous epidemic of emigration from the vast overcrowded portions of the old world to Canada," said Dr. T. C. Rortley, secretary of the Canadian Medical Association, at the meeting of the Calgary Board of Trade.

Dr. Rortley based his expectation on the discontent in the overpopulated areas of the world, the fact that Canada's population was as yet only two and one-half persons to the square mile, and to the power of attraction exerted by the wonderful and undeveloped natural resources of the Dominion.

Population was the greatest need of Canada, the doctor admitted, but he warned his hearers that everybody should not be welcomed here.

"Our southern neighbors do not hesitate to apply us with information which clearly illustrates the danger of admitting to a new country the rejected of other nations. At the present time their greatest problem arises from the difficulty of handling about 100,000 people. They have crime waves of extraordinary proportions. The class who create the useful citizens in the United States number only 1.3 per cent, while the degenerates average families of 6.7. Where will this tendency lead that great country? There are possibilities who say they are headed for destruction."

Principle of Selection

Dr. Rortley pointed out that the principle of selecting high-grade animals as the basis of a herd was exact but in effect and he believed that strict selection should be exercised in choosing people. He also showed that the present deportation system returned 870 people out of 92,000 examined. He thought this rejection all to the good, although the system which allowed a man to break up his home in his own country and sever his connections was distinctly cruel. The immigrant should be accepted or rejected before leaving his own country.

"Although the future development of this country is intertwined with the need for population nobody who has had a wide experience in the Dominion can doubt that a selective immigration policy is absolutely necessary," said the doctor. It was agreed, however, to bring any type of men here without making arrangements for their placement.

Dr. Rortley was also strongly of the opinion that a National Board of Management should be created to deal with the various problems associated with immigration. This should be a permanent institution not associated with any political influence. "Politics change from time to time, but the country goes on forever," said the doctor. The brain trust in the Dominion was required for the task which was not one for Alberta or Quebec alone, but one vitally affecting Canada as a whole.

Gives Illustrations

Vividly illustrating the differing values of the immigrant to the country of his adoption and the grave dangers which arise from haphazard immigration, Dr. Rortley recited the cases of two immigrants to the United States. The one, whose name was Jake, was to commence with, a moral degenerate. His descendants had been traced through several generations. They numbered 289. Three hundred of them died in infancy. The professional paper case claimed 210. These were wrecked by disease numbered 440. One-half of the women were immoral in character. The convicted criminals reached 120. The women were 40. Seven of them were convicted of murder. Of the 20 who learned a trade 10 acquired their knowledge in a prison. This family cost the nation \$2,500,000 and gave little in return. In contrast the doctor invited his

audience to consider the descendants of a settler named Edwards.

In this case there were 1294 descendants. Of these there were 1295 college graduates. Thirteen became college presidents and 65 professors. There were 60 physicians, 100 clergymen, 75 army and navy officers, 69 authors, 101 lawyers, 20 became judges, 80 secured public positions of trust and one became vice-president of the United States. There was no convict in the family. The family gave valuable service to the community and the cost to the state was nothing.

"Selective immigration is a necessity," the doctor concluded. "We owe it to ourselves and to the future of the great country with whose destinies we have been entrusted."

Obituary

EMIL VATERLAUS

The funeral of the late Emil Vaterlaus, who was accidentally killed in the motor accident about three miles south of Wetaskiwin on Saturday evening, took place from Moore's Undertaking Parlor on Tuesday afternoon. Deceased came from Switzerland and last spring was and aged about thirty years. The service at the parlor and graveside was conducted by Rev. P. C. McGee, and the interment was in the Wetaskiwin cemetery.

Town Topics

Mrs. Wiseman and Mrs. Taylor were at Red Deer recently taking part in a golf tournament.

W. A. McAllister is moving this week into the residence he recently purchased on Pearce street east.

Miss Labock of Sacramento, Cal., is spending a few days visiting at the home of Mr. and Mrs. C. W. Wallis.

Miss Madcock, principal of Lincoln girls' school, Edmonton, visited Mr. and Mrs. H. C. Cooke on Sunday.

A meeting of the W.A. will be held next Tuesday, Sept. 27, at 4 o'clock in the Parish Hall. All interested are invited to attend.

Mr. Joe Fish and family of Calgary, spent the weekend with his uncle, V. E. Thompson. Mrs. Fish and family will remain for a few weeks.

The Women's Institute Tea and Pool Sale has been postponed until Saturday, Oct. 8, and the regular meeting advertised for Sept. 29 has been cancelled owing to the prevalent epidemic.

John C. Orr of near London, Ont., spent a few days of the past week visiting at the home of his son, J. S. Orr. He is on his way to the coast, and expects to spend some time here upon his return.

James R. Reilly and Edward C. Fisher, of Edmonton, were in the city this week and made arrangements with Montgomery Bros. to act as their representatives for their general fur business in Edmonton.

Miss Verna Allen returned a few days ago from spending six weeks with relatives and friends in Everett and Seattle, Wash. She is now being congratulated upon having passed in all grade XII examinations.

Mr. and Mrs. Stanley MacEachern, who have taken up their residence in Inuit, where Mr. MacEachern is manager of an elevator, were week end visitors at the home of the former's parents, Mr. and Mrs. D. MacEachern.

Mr. and Mrs. Stanley MacEachern, formerly of Winnipeg, have taken up their residence in the house recently occupied by Dr. and Mrs. Greene. Mr. MacEachern is the manager of the Province elevator, which is in the course of erection—Inuit Press.

Earl Garlough received a telegram on Monday advising him that he had been successful in passing his examinations at the Queens University and was now entitled to receive the degree of Bachelor of Arts. We join in extending the heartiest congratulations.

V. M. P. (Dick) Shaw of the Bank of Montreal, Wetaskiwin, who has been visiting at the home of his mother, Mrs. H. P. Shaw, 108 street, was pleasantly surprised by a visit from a number of Edmonton friends on Wednesday night. A musical program was arranged and dancing ended a most enjoyable evening. Mr. Shaw left for Wetaskiwin on Thursday—Edmonton Journal.

VERDICT BY JURY

(Continued from Page 1) the car and felt the car dragging off to the left side. Just as it left the road I stepped on the gas and tried to get the car back on the road. Vaterlaus had grabbed the wheel below

my arm and I lost control. The wheel seemed to be locked. The car jumped ahead and up. I have a slight recollection of glass flying around and was hit in the face. I was thrown out of the car through the roof. I was not unconscious but dazed. I found myself in the ditch with the car facing westerly, the front wheels being in the ditch and the back wheels on the bank. Von Allmen and I were on the south side and Vaterlaus was between us, with his feet towards the car, about two yards distant. When I got up I helped von Allmen to his feet and then went to Vaterlaus, who was lying on the ground. His coat was open and I saw the back he had taken from my house. I took the flask and threw it away as nobody was supposed to have a flask in the car. I next examined Vaterlaus, but did not think he was seriously hurt. We went south on the road, looking for help, possibly half a mile, and met a car which we stopped. They told us a larger car was coming and drove on. We went back to the wreck in the car and there we stayed while the car went to town and notified Sgt. Broadbent and the doctor. Again examined Vaterlaus and thought he was still breathing. Mr. Angus and Mr. Kingzett came out and Kingzett examined Vaterlaus by flash light while Angus took von Allmen and myself to Dr. Stevenson's office. I told the doctor I thought a man was dead and told him to rush down as soon as possible. I asked von Allmen if he was alright and he said he was. We then left for the accident. Upon our return he washed my face and then took von Allmen to the hospital. I thought I had a puncture. I examined the wreck next morning. Both left wheels were off and spokes were broken, and other damage done, but I did not see any blood on the fender.

Chief of Police Kingzett was the next witness and he stated he was called to the scene of the accident the night it happened. The car left the grade and about twelve paces the car laid; there were spokes lying around and in the bank was a square evidently made by the top of the car. The next day I again examined the wreck, and found the top of the car was gone and the left rear of the car was damaged; a fender was bent and tires were off and wheels broken. There was considerable blood on the fender. On Saturday night the fire was away from the car and was flat, caused by the valve being blown off. There were no sails in the tire, but next morning about eleven o'clock there was a nail in the tire. Found no liquor in the car.

Stewart Poole, vulcanizer, stated that on Sunday he was shown a wheel on which the tire and inner tube were gone. There was a broken valve on the tube causing the air to go out. There was not a puncture. There was a nail showing on the tire sticking through half an inch on inside. It could not be put into the tire without puncturing the tube.

Sgt. Broadbent also went into the box and corroborated the evidence of Chief of Police Kingzett. The right hand front fender was pushed back on wheel and blood was running down, also human hair was on the hood, where the blood was clotted. He found the tire of the front wheel with nail in it and valve broken right out. He had brought tire and tube to Stewart Poole and these were taken off in his presence, and found a sharp nail which had not been on the road.

Dr. Stevenson volunteered the information that he had examined Rosewell and von Allmen very carefully in respect to liquor on them, as they were stupid from shock, and there were no symptoms of liquor whatever.

A. S. Rosewell also volunteered the information that he had gone to the office about eight o'clock for the song books and had taken them to Hobbs in his car.

The jury then retired and in about an hour brought in the verdict as above stated.

DEPOSIT MUST BE PAID

(Continued from Page 1) and that the operation of his department suffers thereby to a considerable degree, on motion of Alderman Scott and Inglis it was decided that in future the City Clerk be authorized to levy a search fee of a minimum amount of twenty-five cents for information of this nature supplied to other owners of property in question and that additional fee be levied in proportion to circumstances prevailing and research involved.

Mrs. Sherbock presented an application to lease lot 25, block 28, adjoining her own property. The Council will endeavor to consummate a sale rather than giving a lease.

The Public Property Committee reported on a list of improved property which had reverted into the hands of the city and recommended that the value be set for the various properties listed. The report was adopted on motion of Alderman Scott and Inglis.

A brief report of relief cases which had been investigated by the Relief Committee was presented by Alderman Inglis and the recommendations were concurred in on motion of the chairman and Alderman Marshall.

In reporting for the Utilities Committee, Ald. Inglis recommended that the regulations to deposit in connection with utility service, as payment on account in advance, which has been in operation for years, be not altered, and on motion of Alderman Parker and Scott the report was adopted. The Police Committee, on motion

MARSHALL'S LIMITED

Marshall's Limited

of Aldermen Scott and Parker, were authorized to make necessary arrangements to provide for the installation of three new steel cells, which will be installed in the city police quarters. These are being provided by the provincial government and will be used jointly by the city and provincial authorities.

Considerable discussion was evoked over an account from Carl Smith presented for earth and hauling. It was argued that this was not in accord with the arrangements made. The city was billed for \$184.50 and the council expressed opposition to meeting this claim. It was agreed to submit payment to the amount of \$27.50 for team work and half-bricks supplied.

Alderman Inglis introduced the matter of repairs to a crossing at the Angus Theatre and other instances of requirements in other parts of the city were introduced. On account of the lateness of the season and the impracticability of cement paving, it was suggested that cinders should be placed at a number of points.

Bylaws were introduced and finally passed for the sale of lots 4 and 5, block 26, to A. J. Collicutt, lot 3, block

1, to Frank Thorne, and lots 27 and 28, block 4, to Jacob Truss.

A lengthy list of arrears for water service totalling \$463.84 was presented by City Clerk Fraser, who was on motion instructed to charge the respective amounts against the different properties.

Fred Kellner put in a claim of \$94 which the council declined to pay. He had placed a crop on city property which had recently been sold to Mr. Wager, and claimed the amount of the value of the crop. The council took the position that Kellner was free to garner his grain but that the city had no responsibilities.

The Utilities Committee reported that in several instances where water connections have been made, property owners have been delinquent in payment for work done by the city inside the property line. Chairman Inglis recommended that a minimum charge of one dollar per foot, payable in advance, be levied, before work in connection with water installation is proceeded with, and the recommendation was adopted.

City Clerk Fraser reported that representatives of the Sinking Fund trustees of the City of Edmonton had

in contemplation the purchase of \$15,000 of Wetaskiwin City bonds which had been disposed of by the city some years ago. These representatives had made a thorough investigation into the financial condition of the city and expressed themselves as being highly impressed with the splendid progress made here in the past few years by the city in the reduction of its debt.

"Here! It's chilly in here. Has the stove gone out?" "Yes, it has." "Well, why don't you light it?" "I can't. It went out with the installment collector."—Judge.

SPORTING NEWS

Pastor Launches Into Hot Criticism of Prize Fighting

Money Spent in Big Time Fistic Encounters is 'Diverted Into Unwholesome Channels'

Calgary, Sept. 19.—With the \$5,000,000 estimated gate receipts of the Dempsey-Tunney fight next Thursday, the Calgary public library could be operated upon its present basis for 105 years without city or provincial grants; the Calgary public and high schools, with 13,650 pupils, could be run for two and a half years without the levying of a cent in taxes; the Woods Christian Home could care for 1200 children, giving them a financial start in life; the Calgary Y.M.C.A. could be operated upon its present basis for 250 years without further financial assistance; the boys' and girls' work boards of Alberta could continue their work upon its present basis for 400 years; the Knox United Church could carry on its Christian work in this city for 66 years without ever taking up a collection.

In a vigorous protest against the spending of this sum to see two men fight and the unequaled amounts which will be squandered in betting upon the bout and the diversion of the money into unwholesome channels, Rev. George Dickson outlined these alternative possibilities for the spending of \$5,000,000 for the public good, from the pulpit of Knox United Church Sunday evening.

Mr. Dickson declared that he was not opposed to boxing in the least, that he even did a bit of boxing himself, but that he did wish to voice a protest against the huge sums to be paid to the principals in the fight, to be spent in stabling it, paid in admission prices and lost and won gambling upon its outcome.

The question which the speaker asked and answered in a forcible address wherein he referred to the forthcoming fight to prove his point was, "Are we a well-balanced people? Are we true to ourselves and our God?"

He found the answer to the question negative, declaring that the people of the twentieth century had temporarily lost their moral and spiritual equilibrium and were placing material things and even human physique high above the moral and spiritual qualities of life which had helped to build the material in the life for which an example is found in Jesus Christ.

To-night's Scrap On the Air about 7.30 Wetaskiwin Time

The Tunney-Dempsey fight will be staged tonight in Chicago between 7:30 and 7:45 (Wetaskiwin time) and radio fans will be glued to their ear muffs at that hour. Latest descriptions from New York state that Dempsey will be the favorite, though majority of sports figure Tunney will retain honors. Preliminary stories will come over the radio from 6:15 on.

Chicago, Sept. 20.—"Training is over, at least as far as boxing is concerned," Tunney said after his final workout. "I never felt better in my life. The cool weather just suited me. My weight is around 189 pounds. I know I am in the best condition; I feel it," Dempsey said. "When I fought Tunney a year ago, I did not have a fight for three years. It took that fight and the one I had with Sharkey to bring me back. I'll regain the title. I feel sure of it."

New York, Sept. 19.—The Wall Street brokerage firm of Kemp and Co. estimates that \$10,000,000 will be wagered on the outcome of next Thursday's heavyweight championship between Gene Tunney and Jack Dempsey at Chicago. Outside of the United

ATTA BOY, CURT! IT'LL HELP SOME WHOLE LOT!

During the course of a conversation between Curt Smith, of the Orland, and one of the officials of the Wetaskiwin Sports Association, reference was casually made with respect to the undertakings of the newly-organized body. Curt caught the spirit of the thing, and without having been approached for a donation, and having previously enrolled as a member, he burst out in his enthusiasm: "More power to you. Will you give me the privilege of contributing \$25 to the funds of the Association. You're on the right road and I am impressed with your methods." It is needless to say that the donation was accepted. Now whence comes the next noise of this kind.

GET WHAT THEY WANT

Over two million dollars worth of tickets for the Dempsey-Tunney fight were sold early, which represents more than 90,000 seats, of which 40,000 are ring-side seats, and 20,000 of them being \$50 each. The world will surely pay the price for what it wants. It is expected 170,000 seats will be occupied when the scrappers face each other tonight.

ARE OLYMPIC CERTAINTIES

Hamilton, Ont., Sept. 19.—C.H. Bricker, of Galt, supplied conclusive proof Saturday of his superiority over Canada's long distance runners and assured himself of number one position on the Canadian marathon team which will invade Helsinki next year. He won the Canadian Olympic marathon trial over the full 26 miles laid out by the Hamilton Olympic club. His time was 2:51:46. H. Webster, Hamilton Y.M.C.A. came in one mile behind the winner.

WORLD'S SERIES OCTOBER 4

Chicago, Sept. 20.—It is announced that the world's baseball championship series will probably open on October 4th. New York Yankees win a place in the series by knocking the American league losers easily. In the National League the Pittsburgh Pirates have the edge, though the Giants and Cardinals may nose them out.

States, it is estimated \$5,000,000 will be wagered on the outcome.

Chicago, Sept. 15.—Completion today of arrangements for handling the record-breaking crowd expected to witness the Dempsey-Tunney heavyweight championship battle Thursday revealed a record of seats that boasts the originally figured total of 160,000 to 170,000. Of this number 42,000 are of the "ring-side" variety, priced at \$40 each.

Chicago, Sept. 20.—The greatest broadcasting hook-up ever attempted, with 55 radio stations in the United States and Canada already listed in the chain and six other stations broadcasting singly in Chicago, will carry the ring-side reports of the Dempsey-Tunney fight to the farthest corners of America, and short wave broadcasts by the powerful stations WGY, Schenectady, and KDKA, Pittsburgh, will take it to the rest of the world. Sixteen announcers will be at the ringside.

Advertisers know the value of the newspapers in their community. Subscribe for the newspaper that the merchants use for their advertising.

Golf Competition Narrows Down

A local tournament is being held by the Wetaskiwin Golf Club this week, and many close games have been played. The keenest interest is manifest and the links are covered with little groups of players as the games are progressing. The following are the results:

Men's First Flight
Petrin beat McMurdo, P. Kirstein beat Somers, Taylor beat Chalmers, Prest beat Knox, Graham beat Barry, Kirstein beat Petrkin and Kirstein beat Prest in the final.

Men's Second Flight
Manley beat Schmidt, K. McMurdo beat R. K. Kirstein, Wiseman beat Ribbura, Bridgeman beat B. Eaman, Hanson beat French, McQueen beat Baker, Bridgeman beat McQueen, McMurdo beat Wiseman, leaving the final between Bridgeman and McMurdo.

Men's Consolation, First Flight
Graham beat Somers, McMurdo beat Knox, Petrkin beat Chalmers, Taylor beat Barry.

Ladies' First Flight
Mrs. Prest beat Mrs. French, Mrs.

NECRO SURE CAN LEAP
Cincinnati, Ohio, Sept. 19.—Dehart Hubbard, Cincinnati negro athlete and holder of world's record for the running broad jump, set a new mark when he cleared 26 feet 2 1/4 inches at a municipal track meet here Saturday. His former mark was 25 feet 10 1/2 inches.

Hubbard also equaled the world's record of 9 3/4 seconds for the hundred yard dash.

TORONTO FINISHES FOURTH
New York, Sept. 20.—Quinn won the International League baseball championship, with Syracuse in second place. Toronto was edged out by Newark for third position, twenty-one games behind the leaders, who had 112 wins for 55 losses.

NEW RECORD FOR JOE

Toronto, Sept. 19.—Joe Wright, Jr., amateur sculling champion of Canada and the United States, established a new world's record for the quarter-mile, when he covered the distance in 1 minute and 11 seconds, at the Argonaut club championships here Saturday. The previous best time for the quarter-mile on lake waters was one minute and 15 seconds.

THOMPSON'S MARK GOES

Stockholm, Sept. 19.—What is claimed to be a world's record was made in a 110 metre hurdle race yesterday when Sten Peterson covered the distance in 14 7/10 seconds, beating the time of E. J. Thompson of Canada. Thompson's record, set in Belgium on August 19, 1926, was 14.8 seconds.

BABE'S CHANCES GOOD

New York, Sept. 22.—Babe Ruth yesterday banged out his fifty-fifth home run and is now but three runs down on his world mark which he set up in 1921.

LACOSTE WINS AGAIN

New York, Sept. 19.—Rene Lacoste, of France, won the U.S. national tennis title for the second year in succession by again defeating "Big Bill" Tilden in the finals 11-9, 6-3, 11-9.

RECORD CROP

(Continued from Page 1)
completion. Additional harvesters could be used in each of the three prairie provinces, but no serious delay will have been caused for by late harvesting. Potatoes it appears, will be a good crop everywhere.

In Manitoba between 90 and 95 per cent. of the wheat has been cut and approximately 65 per cent. of other grains are down. The crop is turning out fairly well, despite damage from rust and frost in some localities. Oats are not turning out well. About 95 per cent. of the Saskatchewan wheat has been cut and about 65 per cent. of coarse grains. The expense of harvesting the crop will be increased in some scattered districts as a result of lodging. A few instances of spotting have been reported, but the areas are restricted.

Frosts were reported in Alberta at scattered points on the night of Sept. 14 and 15, any damage being confined to the central subdivisions, grain generally is beyond danger from frost. What threatening has been done has shown a satisfactory condition as to grade and yield.

Look at the label on your paper

Unsettled weather in British Columbia has injured the tomato crop. Apples have been improved in size and color by recent rains. Fodder crops are good and the tobacco crop in the Okanagan is shaping well.

NINTH FORTNIGHTLY CROP REPORT

(Issued by Department of Agriculture, Government of Alberta, Edmonton, September 12, 1927)

Rain during past week delayed harvesting operations over most of the province. Light frosts occurred in some parts of Southern Alberta but so far as can be determined no material damage has been done.

Harvest cutting in the Grande Prairie district is almost completed. Throughout the remainder of the province, reports indicate that from 60 to 90 per cent. of wheat is in the stack. Some of the grain has been cut slightly on the green side but on the whole the indications at present are that the general quality will be good.

There is considerable lodging of oats and barley in certain districts. This will make the crop somewhat difficult to handle, but is not likely to cause any great amount of loss.

Threshing has just commenced in a few of the earlier districts, but will not be general for another ten days or two weeks.

All indications go to show that there will be a heavy yield of all the different grains throughout the whole province.

Labor has been reported short from a few districts but in general it would appear that there is a sufficient supply.

NO FALL SESSION FOR LAWMAKERS

Ottawa, Sept. 16.—There will be no fall session of parliament, this year. The fact that last year the session began before Christmas leads to many inquiries now as to the probability of the next meeting. It is officially intimated that the gathering will be till late in January or possibly early in February.

The December session last year was accelerated by the lack of supply, parliament having been dissolved abruptly before finishing its work. No such conditions now obtain.

NEW LUTHERAN INSTRUCTORS

Canmore, Alta., Sept. 19.—When the Canmore Lutheran College opens for the fall and winter term on Monday, October 2, there will be some changes in the personnel of the staff. Mr. C. A. Roming, B.Sc., succeeds Prof. A. H. Soheim as principal. Mr. Soheim lately resigned his position in the school to take charge of the Lutheran Church in Calgary. Mr. Roming and his family have already taken up residence in Canmore. The other members of the teaching staff will be Ed. von Berg, commercial subjects; Miss Dieckrickson-Höyme, music; Elmer Moe, B.A.; Mrs. Anna Lund, B.A., and Miss Florence Benson, B.A. It is expected that the 1927-28 classes will be the largest in the history of the school. The courses provided, include high school, commercial, normal, entrance, university matriculation, parochial, music, Bible and newcomers.

Look at the label on your paper

ROYALTY PRODUCES MORE GASOLINE THAN ALL OTHER WELLS IN THE DOMINION

Royalite No. 4 well in Turner Valley field, Alberta, produces more gasoline or natural gasoline than all the other 2,000 producing wells in Canada, according to a statement issued in a report on natural gas and petroleum wells prepared by John McLeish, director of the division of mineral resources, Department of Mines, Ottawa. With the bringing in of this well in 1924, states this report, Alberta assumed first place among the provinces of the Dominion in the production of oil. Royalite No. 4 yielding an average of 455 barrels per day of high gravity oil in 1925 and more than 600 barrels per day in 1926. Indicates today, the report continues, results that Turner Valley is one of the world's largest gas fields.

IMMENSE COAL RESOURCES OF THIS PROVINCE

Alberta has 14 1/2 per cent. of the world's estimated coal reserves; 21 per cent. of the North American reserves; 72 per cent. of the British Empire's reserves, and 87 per cent. of Canada's reserves. Alberta's estimated coal reserves total 1,035,029 million tons. Annual production has reached between six and seven million tons.

FIRST COMMERCIAL FISH HATCHERY IN ALBERTA

Construction of the first commercial fish hatchery in Alberta will be started this month. It will be located at the mouth of Canyon Creek, on the south shore of Lesser Slave lake. It is estimated that 100,000,000 white fish will be propagated at the hatchery every year to maintain an unlimited supply of fish for the many commercial companies operating in the lake.

CHINESE CAFE AT KILLAM IS ROBBED

Killam, Sept. 16.—The City Cafe, owned and operated by Moon Gel, a Chinese, was entered by parties unknown, and the cash register taken. The door was forced. The proprietor reports that between \$25 and \$30 was taken. The robbery was not reported as yet and no clue to the robbery has been found.

BLOOD TRANSFUSIONS

The friends of Mrs. William N. McDermott, who has been seriously ill at the Lacombe hospital as the result of a minor operation, will be pleased to learn that she is convalescing. Mrs. McDermott had several severe hemorrhages shortly after her operation and it was necessary to transmit two blood transfusions within twenty-four hours, her husband furnishing a pint of blood, which the attending physicians say saved her life.

BEHIND THE TIMES

"Shall I dress the chicken for you madam?" asked the butcher of a newly wedded bride. "Yes, if you'll be kind," she replied, "for I really don't know what they are wearing this season."

The Times does commercial printing at right prices.

FOX FARMING GREAT ALBERTA INDUSTRY

The number of silver foxes in Alberta has doubled in the past year, according to estimates made by Mr. H. S. Oulton, the inspector for the Canadian National Silver Fox Breeders' Association, who is in Calgary at the present time. Last year there were 3,000 registered foxes in Alberta, and there will probably be 3,000 more for registration this year.

There are 75 registered fox ranches in Alberta. The number of foxes on a ranch varies from a few pair on the smaller places, up to 500 pair on the largest place, the Colpitt Bros. fox farm, which is located southeast of Calgary.

It is the belief of Mr. Oulton that the gross profit from the sale of Alberta raised pelts will be more than \$600,000. There will also be a considerable profit made from the sale of live foxes for breeding purposes. At the present time Alberta ranks fourth among the provinces in relation to the size of the fox industry.

Mr. Oulton stated that the stock on the Alberta ranches compares favorably with the stock elsewhere in Canada. Most of the Alberta stock originally came from Prince Edward Island, the birthplace of the industry in Canada. There are some very fine animals to be seen on the ranches in the province.

Last year the association took in \$38,000 from registration fees alone. This profit enables it to market the pelts for its members free of charge. This year the association will probably handle more than \$40,000 worth of furs.

A WORD OF CAUTION

Remember that when you neglect a "bad cold" you are inviting an attack of influenza or pneumonia. A severe cold in young children is always serious as it spreads very rapidly, if not checked, to the bronchial tubes and results in broncho-pneumonia, a disease that fatal in children under five years. If your young child takes a cold, consider it as a serious illness and get medical assistance at once.

Hundreds of lives would be saved annually and thousands of cases of sickness prevented if people were under five years. If your young child takes a cold, consider it as a serious illness and get medical assistance at once.

BIBLE SOCIETY REORGANIZE

On Sunday the new secretary of the Bible Society, Rev. J. K. Smith, assisted by Rev. W. H. Pike, presented the work of the society in several of the churches of the city in the evening a meeting was held in the First United church to plan for the future. The officers elected were Mr. C. A. Morris, president and Mr. J. F. Ellis secretary-treasurer. The churches appointed were Mrs. Peterkin, Mrs. Vars, Mrs. Victoria, Mrs. Barnett, Ms. John Shaw, Mrs. Mellett, Mr. J. Berg, Mr. Mellett, Miss Comp-ton, Mrs. Sophiak, Mr. Morris and others to be selected. There will be a meeting of the officers and collectors on Monday, Sept. 26, at 8 p.m. in the Swedish Baptist church. A general canvass will be made immediately after this meeting.

CARNIVAL POSTPONED

Canmore, Alta., Sept. 18.—The management of the Canmore Elks' carnival which was to have been opened on October 6, have announced its postponement until October 29. The carnival will run for a full week in the splendid new municipal skating rink erected last year.

GRADE CROSSINGS PROBLEM WILL BE GIVEN ATTENTION

Montreal, Sept. 17.—There are some 20,000 grade crossings in Canada. Supporting on an average four trains a day pass over the railways with these grade crossings. It means 120,000 chances for collision with motor or horse drawn vehicles. Accidents at grade crossings are constantly recorded. While nearly every grade crossing is marked for the benefit of users of the highways, more protection is required in many cases than simply the familiar warning sign. These facts are now receiving the attention of the officers of the Canadian Good Roads Association and they will occupy an important part of the program at the Association's annual convention of the 21st and 22nd of September at the Hotel Macdonald, Ottawa.

and 22 and is given consideration at the next international convention. Officials of the Association take the ground that the solution of the grade crossing problem is essentially a matter for co-operation. The railways must be consulted and in the past the big Canadian lines have demonstrated their willingness to act in this respect and have delegated some of their clever experts to give the problem their attention. Those who are active in municipal government must also be parties to a solution, because in most cases the expense in connection with the elimination of grade crossings must be shared by the municipalities. The Canadian Good Roads Association feels a direct responsibility as well, because a large part of the duty of the association today is to render safe for human beings the improved highways already built.

It is not certain whether or not they actually heard it. They simply took a hasty glance in both directions down the track and speeded up to get over. Four motor drivers stopped and made more careful inquiries before proceeding.

MEMBERSHIP IN A.M.A. VALUABLE TO TOURISTS

The emblem of the Alberta Motor Association is an open sesame to a great field of courtesy, hospitality and services during a tour to other parts of the country, particularly in the United States and Eastern Canada. Such is the enthusiastic verdict of V. R. Howson, of Edmonton, who returned home recently from a 7,000 mile motor trip with his family to Minneapolis, Milwaukee, Chicago, Detroit, Toronto, Ottawa and many other big centres of the east and middle west.

"Through affiliation of the A.M.A. with the American Automobile Association and its hundreds of clubs, my membership was invaluable to us on the entire trip," states Mr. Howson. "We obtained the latest maps and road information which enabled us to travel without difficulty and loss of time; found first class A.A.A. hotels at every point, and at the garages listed with the A.A.A. received prompt attention without fail."

SAFETY HINTS

When operating a motor vehicle at night going in the opposite direction, always consider that the occupant in the other motor vehicle wants to see, so "Dim your lights."

When operating a motor vehicle around a blind turn always bear in mind that there may be someone coming from the opposite direction. "Slacken speed and blow your horn."

Look over your car before leaving for town, or when leaving town, as there may be some faulty parts thereon "which may be the cause of endangering human life."

Last but not least, "stay sober," while operating a car, as it is not pleasant to be charged with manslaughter by an accident resulting therefrom.

Drastic action will be taken in future for any violation of the Vehicle and Highway Traffic Act.

BAWLf LOSES TWO STORES BY FIRE

As the result of a fire which occurred at 1:30 o'clock on Wednesday morning, the business premises of the Bawlf Hardware and Bawlf Bakery were burned to the ground. The fire, it is believed, started in the bakery building, and had it not been for the previous disposal of rats, it is probable that half the town would have been consumed by the flames. The roof of the hotel, on the opposite side of the street, caught fire many times, but was extinguished before the fire obtained a good start. Mr. and Mrs. Chas. Sargent, who lived above the hardware store, lost most of their personal and household effects.

It is understood that the Bawlf Hardware carried a \$20,000 stock, covered by insurance.

THREE LOCAL OPTION VOTES ON OCTOBER 19

Three more local option votes have been set, with Oct. 19 as voting day. They will be as follows: Hayter, hamlet, Mrs. Catherine Dalbridge, returning officer; Cayley, village, M. H. Morrison, returning officer; Melisio, hamlet, O. H. Selby, returning officer. A vote is to be taken in Calahad and Milburn, as previously announced, on Sept. 20.

"Those apples you sold me have a fishy taste," said a lady in a grocery store. "Such nonsense," replied the clerk. "they're crab apples."

Canada Must Win Respect by Soul of Her Many People

Winnipeg, Sept. 17.—Canada will not win the respect of the world by her wheat fields nor her gold mines, but by the soul of her people. The pioneer has disappeared in Canada and the fact that it is a new country is no longer an excuse for being culturally inferior to the old countries, declared Sir Robert Falconer, president of Toronto university, in the course of an address to the Women's Canadian Club here last night, in which he made a plea to Canadian women to realize that Canada has a high purpose and must strive for cultural and intellectual eminence.

Continuing, Sir Robert pointed out that Canada is geographically the centre of the world as it is constituted today and also in a central position so far as cultural things are concerned. To the east is the western civilization or culture; to the west, the oriental. And in the next generation there will be a serious contest between the orient and western world and their civilization.

"Our children," Sir Robert asserted, "will face this clash more than we will. If our civilization has a soul it will be so powerful that our children will be able to meet the new civilization and uphold their ideals. Canada's only hope lies in the advancement of real culture."

Continuing his theme, Sir Robert pointed out that there had been a great improvement in the line since his boyhood. Throughout the west he had found beautiful homes, beautiful schools and institutes of higher learning, prints of good pictures in the homes and good influence through radio and reproducing music instruments. People were reading more and better books. These influences, he said, all made for fuller life for the growing generation.

HOME-MADE JELLIES

In making different kinds of jellies the housekeeper very often finds the results of her work to be somewhat uncertain. Sometimes the jelly refuses to harden, or it becomes sticky, or some other trouble crops up. However, a bulletin on Preserving Fruits and Vegetables in the Home, distributed by the Publications Branch of the Department of Agriculture, Ottawa, tells how to avoid these difficulties. It is pointed out that in order to make good jelly it is essential to have fruits that contain pectin and acid. The best fruits for making jelly are those which contain these two ingredients in the proper proportions, such as apples, grapes, currants and plums. Strawberries, blueberries,

Had To Stop Five or Six Times To Get His Breath

Rev. John Phalen, Ph.D., Brooklyn, N.S., writes:—"For about three years I have been troubled with severe, distressed spells in my chest, especially when walking uphill."

"On my last charge, in the town of Guysboro, we had a number of heavy hills, and on coming up the hill from Commercial Street, to my house, a distance of about one hundred and fifty yards, I frequently had to stop, five or six times, to get my breath, and ease off the awful distressed feeling. I saw your advertisement for

and ordered a few boxes. Altogether I took eleven boxes. They certainly helped me, and for over a year I was not much distressed. I am not taking them now, and can get along very well, except to hurry uphill or rush with my work."

"I would strongly recommend Milburn's Heart and Nerve Pills to any one suffering as I did, when at times my nerves were continually on the 'jump,' and I could get but very little rest."

Price, 50c. a box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

CHEVROLET Asks No Quarter

CHEVROLET takes conditions as they come... and overcomes them. Rough roads leave Chevrolet unconquered. Even where no road existed, Chevrolet has still provided transportation. Chevrolet Fisher bodies are strong as they are beautiful; and the Chevrolet engine is as rugged as it is smoothly powerful. Chevrolet is built to endure.

The quality which gives Chevrolet such staunch dependability is the same quality which gives Chevrolet the lowest up-keep and maintenance costs in the world. And this—the most amazing quality in Chevrolet History is now available at new, lower prices, the lowest for which Chevrolet has ever been sold in Canada.

Let your Chevrolet dealer demonstrate Chevrolet performance.

etc., lack pectin and require the addition of apples or currants which are rich in pectin content. When fruit becomes over-ripe its pectin loses its value for jelly-making. It is therefore necessary to use fruit which is just ripe or slightly under-ripe. Full directions for making jellies and a number of recipes are given in the bulletin.

Plenty of Power for the Hard Jobs

Everyone who has seen this compact, light weight tractor at work marvels at its power. We want you to see it—watch it in the field or at the belt—you will be surprised at the power of the

John Deere Model D Tractor

This 15-27 H.P. tractor weighs only 4,000 pounds—power ordinarily wasted in moving excess weight in the field is applied to the drawbar of the John Deere. The John Deere is hundreds of parts simpler—it's the tractor of fewer and sturdier parts. Power moving parts reduce friction, one of the biggest power thieves in any engine. Belt pulley is mounted directly on crankshaft—no power loss. All operating parts of the John Deere are automatically oiled and completely housed in a dust-proof casing is positive, dust and sand cannot get in to cause friction, loss of power and undue wear. John Deere one-piece frame holds all units in permanent alignment.

The great power of the John Deere will surprise you. Drop in and see this sturdy tractor next time you are in town. Let us arrange a demonstration.

printing, with Mr. Graham, at the Drug Store.

MILLET LOCAL NEWS

School will re-open on Monday,
September 26.

Mr. J. West and C. S. Moon motored
to New Norway on Sunday.

A new player piano has been added
to the waiting room in the Arlington
Hotel by Mr. Wright.

Mrs. Kelly, of Rossland, B.C., spent
several days with her sister, Mrs.
Moiffet.

Work on the new Imperial Bank
building is being rushed through in
good style.

Lloyd Wolf has started the threshing
season with a new Waterloo separator
and a Titan tractor.

Duck shooting opened on Thursday,
the 15th, and there have been several
fine bags brought in by the local mil-
lens.

Two horses belonging to C. Cam-
mings were killed near the railroad
crossing east of the depot on Sunday
morning.

The Harvest Thanksgiving service
(Church of England) is announced for
Sunday, Sept. 25. It is expected that
the Ladies choir will attend. Every-
body welcome.

MY GOITRE OPERATION

I've had my head cut loose in front.
Some surgeon pulled a clever stunt.
First, stretching me upon a table
They tied and strapped me 'til I was
stable.

With one mad leap the surgeon, he
Climbed on my chest and with one
knee
Pressed tight upon my Adam's apple
I could feel him wrench and grapple.

Then, waving his dripping knife,
He yelled, "The thing we do to save
this life.

Is cut a little here and there,
She's too much thyroid, some to spare.

He snatched my wind-pipe with a
yank—
Turned my gullet over—spunk
And ever anon he'd shout,
"We've got to get this goitre out."

It came, and working on a space,
He severed me up with a space shoe
lance.

Then, as the day was getting late,
They hauled me out like a hunk of freight.

They grabbed me by the heels and head
And tossed me over on the bed.
I heard them say, "She'll be alright."
But oh, the horrors of that night!

My goitre gone. And every day,
I'm feeling better in every way.

With one lung-drawn, heart-tearing
sigh,
I've bade the thing a last "Good-bye."

BACK NUMBERS

(Walt Mason)

My faithful bus is humming. It works
as good as gold; it's always up and
coming—it's only two years old. I
should be quite contented, and happy
as a queen; since autos were invented
no better has been seen. Along the
road she toddles, alert and debonair;
but there are later models, with jinks
here and there, with more impos-
ing fenders and windshields in one
place, and all the later splendours—
improvements never cease. And I am
yearning, pining, to have the latest
wain, all glittering and shining—the
old one's looking queer. Since all
throughout the nation this is the way
men think, "the point of saturation"
is strictly on the blink. No man can
bear to travel on journey near and
far, and kick up dust and gravel, in
last year's dinky car. Men's satisfied
with wearing old clothes long out of
style, and he'll go blithely faring in
ancient shoes or tike. His house may
stand unpainted and looking punk and
cheap, until he's dead and sainted, and
he will lose no sleep. He'll sip from
rusty fagon and get from splintered
plate, but he must have a wagon that's
strictly up-to-date. And so the used
car quarters are jammed with cast-off
wains, that men may buy rip-snooters
with plate glass window panes; the
latest car arouses a fierce desire to
own, and so we pawn our houses and
sell our bottom bone. "The point of
saturation" of which men tend to talk
in fear and agitation, is backed clear
off the wall.

SHE LIKES SCHOOL

A young fellow from here was driv-
ing along a country road southwest
of town when he overtook a group of
school children, and when he offered
to give them a lift they all piled into
his machine. There wasn't room for
all of them on the seats so one of the
girls had to sit on the driver's lap.

"Do you like school?" he inquired.
"Yes, sir," she replied.

"Do you go to school every day?"
"I never miss a day."

"Good little girl," he remarked, kiss-
ing her on the cheek. "And do you
like your teacher?"

"I am the teacher," she replied.

THINK IT OVER!

You can leave a will direct-
ing how to handle your estate,
but not your reputation. The
public will attend to that.

PRESCRIPTIONS FOR CATCHING

Sit in the house with a window open,
but out of sight, admitting a blast of
cold air to cause a draft. A sudden
chill and sneeze will announce the
success of this method.

Sit in an over-heated office or dwell-
ing room over-ventilated, until the heat
is expell'd and the nasal membrane
dry; then open a window and sit in a
draft—seldom fails.

Put on evening dress, go to a big
dinner and eat heartily—and maybe
drink; inhale plenty of dry, over-
heated, smoke-laden air, until you feel
death and thoroughly fatigued; and
then go home with cold flapping open
and the wintry blast striking your ex-
posed neck and chest.

Wear thin soled shoes and get the
feet soaking wet in cold, damp weath-
er and be too busy to change and put
on dry garments.

Change to light weight clothing in
borderline seasons and get caught in a
cold snap.

During a cold snap have a short hair
cut, military style, up to the ears.

Here and There

One year from date of publication
in the Canada Gazette now require
passengers requiring the inspection and
padding of fruit for exportation
into effect.

That all fresh fruit must be inspected
and an export inspection certificate
issued showing the grade before leav-
ing the country.

A record was established at Que-
bec recently with nine passenger
vessels arriving and landing pas-
sengers and mail, the largest num-
ber ever to visit the port at any
one time. Included in the arrivals
were the "Empress of Scotland,"
the "Montclair," "Montclair,"
"Marloch" and "Mellita" of the
Canadian Pacific Steamships.

A new high record of \$15,241,
821 in gold production of the prov-
ince of Ontario during the first
half year is shown in the re-
port just out, the increase over the
similar period of last year being a
quarter of a million. During the
same half year the total production
of all minerals in Ontario was
100,225, as against \$2,584,402 for
the same half year of 1926.

To serve the interests of hundreds
of farmers in Southern Saskatchewan
two new branch lines of the
Canadian Pacific Railway started
operation on September 1st, accord-
ing to announcement by D. C. Cole-
man, Vice-President of the C.P.R.

The longer of the two lines run from
Assiniboine south to Coronach, a
distance of 80 miles, and the other
a 27-mile stretch, runs from Brom-
head to Lake Alton.

The 100 members of the British
Newspapers' Society left Canada
thoroughly impressed with the op-
portunities Canada possesses. Their
impressions are that Canada was
already great and is potentially
much greater, and they were am-
azed that so much could have been
accomplished in Canada in such a
short time by so few people. They
sailed from Montreal on the Cana-
dian Pacific Steamship "Mont-
clair," the ship having a large pas-
senger list.

After a strenuous six weeks trav-
elling across the Dominion of
Canada, Their Royal Highnesses,
the Prince of Wales and his brother
George, embarked on the Canadian
Pacific Flagship, the "Empress of
Scotland," tired but happy. Prince
Edward says "I've done it. I come
from your country I am more and
more attracted by the wonderful natural
scenery and the warmth of the wel-
come extended by Canadians, and
trust that it will not be long be-
fore we meet again."

Approximately 1,000 members of
the American Legion visited Mon-
treal on their way to Paris, France,
where they will hold their 20th an-
nual convention. The people came
from Idaho, Buffalo, Wisconsin,
Washington, Montana and North
and South Dakota. Frank X.
Schwab, mayor of Buffalo, gave the
Legionnaires of that city a wild
buffalo to be presented to the citi-
zens of Paris. They crossed to Ant-
werp on the "Montclair" and
"Montclair," both liners in the
Canadian Pacific service.

"A land of good wages and un-
limited possibilities," is the man-
ner in which Premier Stanley Bald-
win characterized Canada in his first
public address in the Old Country
after his return from the Domini-
on. Ninety-five per cent. of the
men (of whom we hear too much)
who go out to the Dominion and
fall, owe their failures to them-
selves. I have no doubt that a man
can succeed on the land who even
if he has not been brought up in
the country at home. A little train-
ing will go a long way."

Economy First
An Irishman was painting a house
and working with great rapidity. Some
one asked him why he was in such a
rush. "I'm trying to get through," he
replied, "before the paint goes out."

Adventurers know the value of the
newspapers in their community. Sub-
scribe for the newspaper that the
merchants use for their advertising.

MILLET LOCAL NEWS

Mrs. H. Brinker entertained a few
friends to tea on Thursday.

Miss Marion Graham, of Edmonton,
spent Sunday at her home here.

Miss Alice McInnis left on Sunday
to resume her duties as teacher in a
school near Dayland.

Rev. Mr. Adams, of Edmonton, spent
Saturday and Sunday in town, the
guest of Dr. and Mrs. Plant.

Several automobiles exchanged
owners on Saturday in the sale con-
ducted in front of the Arlington hotel.

Mr. J. H. Parker, of Los Angeles,
Calif., arrived on Saturday on a visit
to his parents, Mr. and Mrs. J. H.
Parker, Sr.

The many friends of Mrs. Parker
will be pleased to know that she was
able to take an automobile ride on Sun-
day, and is much improved in health.

Mr. and Mrs. N. Ward and son
Marcus, of Vancouver, arrived Thurs-
day evening for a few weeks visit
at the home of Mrs. Ward's parents,
Mr. and Mrs. A. D. Rupert.

BRIGHT BITS FROM EVERYWHERE

"Where did you get that fine new
hat from?" "I bought it 10 years ago.
Seven years ago I had it newly pres-
sed. Three years ago it was dyed
black. The year before last I had a
new band put around it. Last week I
exchanged it at the restaurant."—
Jugend (Munich).

It would be awful to get your hair,
teeth, complexion and so on fixed up,
as advised in the ads, and then dis-
cover the reason you aren't general
manager of the firm is that you don't
know enough.—Terre Haute Tribune.

Hard-to-Pleasant Customer: "No—no,
I simply couldn't walk a step in shoes
that pinch like that." Patient As-
sistant: "I'm sorry, madam, but I've
shown you all our stock now. These
shoes you have on are the ones you
were wearing when you came in."—
Pathfinder.

If you want to get brunched, try sell-
ing garden hose and sprinkling cans
in southern Louisiana.—Dallas News.

Travelling Salesman: "Did you like
the cigar I gave you? For 500 coupons
of that brand you get a banjo." Clerk:
"If I smoked 500 of those cigar,
I guess I'd want a harp."—Progressive
Grocer.

Judge: "How did you come to steal
the automobile from the cemetery?"
Prisoner: "Well, your honor, the car
looked so lonely at the gate, that I
thought the owner must be dead."—
Berlin Dorfbräuer.

"Pa, what's the difference between
a hill and a pill?" "I don't know, my
son, unless it's that a hill is high and
a pill is round—is that it?" "Naw!
A hill is hard to get up and a pill is
hard to get down."—Boston Trans-
cript.

There are just two kinds of people
in this world. One kind is trying to
get free advertising into the news-
papers. "I can't think of the other
kind just now.—Mesa (Ariz.) Jour-
nal-Tribune.

A luxury is something that costs
\$7.63 to make and \$20 to sell.—Wind-
sor Border Cities.

HE DID KNOW SOMETHING
Tommy entered the parlor, where his
sister was entertaining Mr. Dub-
leigh. Walking up to the latter, he
held out his hand, in the open palm
of which were a dozen small white
objects.

"What's them?" he asked.
"Why, those are beans," answered
Dubleigh, with an ingratiating smile.
"He does know 'em sis," said
Tommy triumphantly to his sister.
"You told me last night that he
didn't."

KEEPING HER TO HER BARGAIN
"A penny for your thoughts, San-
dy," said Jean.

"Well," said Sandy, with sudden
boldness, "I was thinkin' I'd like to
kiss ye, lassie."

Jean blushed but made no objection,
and after the kiss they lapsed into
silence. Presently Jean said, "And
what are ye thinkin' about now, San-
dy? Another kiss?"

"Nae, lassie, it's mair serious, this
time, I was just wonderin' when ye're
able to pay me that penny for my
thoughts."

Betty—"Have you any green lip-
stick?"

Drug Clerk—"Green lipstick?"

Betty—"Yes, a railroad man is tak-
ing me out tonight."

ing at right prices.

When
You
Travel

Are you going abroad this year?
If so, we suggest you carry a Letter
of Credit. It is the most satisfactory
method of providing your needs in
foreign currencies. It acts as an in-
roduction to bankers in all parts of
the world, and then, your funds are
drawn from your own Bank only as
you draw on the Letter of Credit.

LET'S FORTH CANADA'S
MINERAL RESOURCES

Winnipeg, Sept. 20.—While the world is recording a decrease in the production of gold, Canada is gradually showing an increase and is rapidly reaching second place as a source of supply. It is stated in a new publication, "Vegetables Wanted at Hospital Here," now being issued by C. Price-Green, D.R.C.S., Commissioner, Department of Natural Resources for the Canadian National Railways. The booklet, which is now available for distribution, deals extensively with the mineral resources of the Dominion, both metallic and non-metallic, and points out that: "The value of our mineral production has risen from less than \$23 million to over \$241 million in 1926; our waterpower development, the potential force behind our mining, pulp and paper and general industrial development has risen from a few thousand horsepower to 4,556,000 h.p.; the export of pulp and paper, from practically nothing to \$173 million; and our foreign trade from \$221 million to over \$2,000 million, representing the largest per capita export in the world."

VEGETABLES WANTED
AT HOSPITAL HERE

The Hospital Board would appreciate the contributions of vegetables of any description from citizens of Wetaskiwin and district who have any surplus to dispose of, and requests the donors to deliver their donations direct to the hospital.

MANY MURDERS IN DETROIT

Detroit, Mich., Sept. 17.—Spurred to great activity by the hundredth murder of the year, police have arrested more than 100 persons in raids on underworld dens, loading houses and "hang-outs." Detroit has experienced a wave of kidnappings, slayings, robberies, shootings, and hijacking escapades. Some quarters believe hired gunmen are responsible for this unprecedented crime activity, as over \$2,000 million, representing the largest per capita export in the world.

Man of Sixty
Finds the Remedy"Fruit-a-lives" Corrected
Bladder and Bowel Trouble

MR. THOS. GRAHAM

Mr. Thomas Graham of Oshawa, Ont., has found the key to health. Writing about it he says: "Just a line to tell you what good 'Fruit-a-lives' has done me. I am 60 years old and tried all kinds of medicines for bladder and bowel trouble which used to keep me from work a month at a time, until I started taking 'Fruit-a-lives'. Thanks to 'Fruit-a-lives' I have worked steadily for four years without a sick day. I have never felt better than I do now." "Fruit-a-lives" substitutes radiant health for sickness. It effectively overcomes constipation, bladder and kidney troubles because it is the kind of remedy that nature meant us to use—the juices of fresh, ripe fruits, intensified and combined with strengthening tonics. You have a right to that "Glad-to-be-alive" feeling. Give "Fruit-a-lives" a chance to restore your health. If you are constipated or worried with bladder trouble begin taking "Fruit-a-lives" today. 25c and 50c everywhere.

GOOD WORK REPORTED
AT LACOMBE PRESBYTERY

The Presbytery of Lacombe met in St. Andrew's church, Lacombe, on Wednesday, Sept. 7, with seventeen ministers and lay representatives present. Officers for the ensuing year were elected as follows: Chairman, Rev. J. H. Francis, of Ponoka; secretary, Rev. R. B. Layton, of Lacombe. The following were appointed convenors of committees: Maintenance and extension, R. B. Layton; home missions, A. L. Elliott; religious education, I. N. Hughes; evangelism and social service, L. N. Macdonald; foreign missions, W. H. Cantelon. Home missions received a great deal of attention. Superintendent of Mission Rev. Thos. Powell described his visit to a new field in the west, for which it was decided to ask for a grant for the erection of a manse and another for the erection of a church. In these places the people were ready to give lumber and labor or these buildings. Encouraging reports were given by students present of the work on the fields they were now supplying. Six hundred new communities were being supplied by the United Church in districts before occupied by any other Protestant church. Messrs. Gilbert of Olds, and Hall of Edmonton, addressed the Presbytery on religious education and prohibition.

SALVATION ARMY TO MAKE
ANNUAL HARVEST APPEAL

The Salvation Army collectors will be calling on you, commencing Monday, Sept. 26.

This is our annual Harvest Appeal, the money is used here to help our local work. What is coming on and many appeals are made to the Salvation Army. We are anxious to help everyone.

We would like to thank the people of Wetaskiwin and district for their help in the past. We have every confidence that they will again assist us in this financial effort.

MAR YOUNG, Captain.

SPECIAL
NOTICES

Ken Maynard and his wonder horse Tarzan, in "The Devil's Saddle," combine all the great acting and marvelous riding of their former hits. The picture will be seen at the Angus Theatre on Friday and Saturday of this week.
